

Inter Operational Cleaners

Advanced Surface Cleaning Technology

**Spray and Immersion Cleaners
for Multi Metal Use**

Driven by cleanliness

Industrial metal cleaning is at the heart of the surface treatment business. MacDermid Enthone's metal cleaning expertise has been put to good use developing a range of water-based cleaning processes. The products are suitable for automotive, architectural, engineering, packaging, and metal fabrications industries. We offer alkaline or neutral solutions. These sustainable foam-free spray and immersion processes provide exceptional cleaning and rust inhibition for batch or continuous cleaning applications. They also ensure that the requirements in the areas of environment, health and safety, handling and easy maintenance are fully met.

Key features

- Sustainable solutions
- Exceptional process life
- Solutions suitable for all common substrates
- Simple application using spray and immersion applications
- Oil separation capability minimizes waste & down time

Inter Operational Cleaners

Advanced Surface Cleaning Technology

Industrial cleaning tasks have challenged MacDermid Enthone to develop products that fit many different application methods, oils and surface contaminants, substrates, cycle times, safety issues and environmental restrictions. Our experienced technical service team are always available to discuss specific requirements. Our extensive range of products has been developed by meeting customer needs time after time.

Product Selection Guide

Product	Application			Properties						Compliance		
	Immersion application	Spray application	High Pressure application >100bar<200bar	Corrosion inhibitor for steel	Multi Metal use	Suitable for dephosphating	Hard water compatibility	Free of Formaldehyde releasing agents	Silicates Free	Boron Free	Phosphate Free	
Aluclean S 606 DF	●	✓	✓		✓		★★★☆☆	✓	✓	✓
